PDF to Markdown for ChatGPT, Claude and AI Agents

Free online file converter with OCR — mdconvert.org

Need a .md file for ChatGPT, Claude or your AI agent? Or do you just need to copy the text out of a scanned page? Go to mdconvert.org, drop in your file, and download clean Markdown in seconds.

This short guide is also a live demo. Drag it into the converter on mdconvert.org. Headings, lists and tables come back as plain Markdown that any AI can read.

Why convert your files to Markdown?

Save money and tokens
A PDF or Word file carries a lot of layout weight that an AI doesn't need. Markdown keeps only the text and its structure. Each prompt costs less, and answers come back faster.

Save time: convert once, reuse many times
Convert a document once, then give the .md file to your AI as often as you like. This helps most with tasks you repeat every week.

Store it, find it fast
Keep your documents as Markdown and AI agents can search them quickly. When you need something, it is easy to find.

Get text out of scans (OCR)
Have a scanned contract, or a photo of a page saved as PDF? mdconvert pulls out the text, so you can copy and paste it instead of typing it again. On paid accounts, OCR uses AI vision to read scanned pages.

Free to start

- **Free conversions every day**, within daily limits.
- **Free credits when you create an account**, so you can try more.
- **Paid accounts** unlock OCR with AI vision for scanned files.

See all plans at mdconvert.org/pricing.

What you gain

Your situation	What you gain
You ask your AI about the same contract every week	Convert once, reuse the .md file every time
A long report you want summarized	The AI reads plain text, not layout, so each prompt costs less
A scanned page, or a photo of a document saved as PDF	OCR pulls out the text, ready to copy and paste
A spreadsheet you want to discuss with ChatGPT	Your table arrives as a clean Markdown table
A folder of documents for your AI agent	Markdown files are quick to store and search

How to try it in 3 steps

1. Download this file from mdconvert.org.
2. Drag it into the converter window.
3. Download your Markdown result.
